DMS 207

Graphite braided tape, Fast setting

August 21, 1984

Mr. R. R. Lally
DOUGLAS AIRCRAFT COMPANY
3855 Lakewood Boulevard
Long Beach, CA 90846

Dear Mr. Lally:

Our records indicate that you have requested Material Safety Sheet(s) (MSDS) on the following:

R-922, Resin-Impregnated Carbon Fiber
Your DMS 2197 & 2183

As you are aware, under OSHA regulations all personnel who use this product must be educated to use proper handling techniques to maintain the safety of their workplace. In order to assist you in meeting your obligation, we have enclosed Material Safety Data Sheet(s) on the above product(s).

The Composite Materials Department of CIBA-GEIGY Corporation has adopted the MSDS as a uniform and convenient method for communicating data relative to the hazardous properties of products and the protective measures to be adopted during their use. It should not, and indeed cannot, be taken as the sum total of all protective measures to be taken. Standard reference works on ventilation, toxicology and fire prevention should be consulted to adequately utilize the data contained in the MSDS.

If you have any other questions or require additional information on the handling, storage, use or disposal of the product, consult with our Safety, Health & Ecology Department by calling the number listed on our letterhead.

Sincerely,

A handwritten signature in cursive script, appearing to read 'J. H. Sanford'.
